About project

This project aims to promote the development of the soft skills of entrepreneurs through a self-diagnosis tool and a catalogue of 40 adapted and innovative training challenges.

All this through a mobile application. The project consists of the development of a tool aimed at people with entrepreneurial concerns with a low level of qualification that allows the self-diagnosis of their soft professional skills, which Will be important determinant for their success as an entrepreneur. The main result - a mobile application, translated into 6 languages, for the development of soft skills aimed at the entrepreneurial potential with low qualification and adapted to its initial level and its evolution in learning. The tool, with "40 training challenges", will adapt to the level of each user from the initial test and will try develop their skills the optimum level.

Adaptability

Training

The training system of the 40 Challenges project is focused to improve skills of entrepreneurs.

For that purpose we propose to use dedicated application available in the Android and Apple stores and possible to download for free. Our application contains 10 trainings of various soft skills possible to train every day.

Trainings are available in 5 languages.

Our training is also available on the project's website: **www.40 challenges.eu**
